OBJECTIVE

As a recent Software Engineering Technician graduate from Centennial College, I'm eager to apply my web development, mobile app development, and programming skills. I'm looking to contribute to a progressive company where I can help drive growth and improve user experience.

EDUCATION

Centennial College, Toronto, ON, 2021-2023
Diploma in Software Engineering Technician

SKILLS

- Web Development: Created multiple dynamic websites utilizing HTML5, CSS3, and JavaScript
- Mobile App Development: Developed several Android and iOS apps using React Native
- General Programming: Proficient in C#, Python, Java, Node.js, Express, and React
- Database Management: Skilled in utilizing PL/SQL and MongoDB databases
- Problem Solving: Strong problem-solving skills developed through hands-on academic projects and troubleshooting code
- Quick Learner: Ability to learn new technologies and apply them effectively

PROJECTS

1. Project 1: "Bug Smasher" - A fun, interactive browser-based game developed using JavaScript and HTML5 Canvas. Users can play and keep track of their scores, with increasing levels of difficulty.
2. Project 2: "Image Gallery" - An image gallery web application built using Ajax and jQuery. It features a sleek UI and smooth navigation, giving users a pleasant browsing experience.
3. Project 3: "Budget Buddy" - An Android app developed in Java, enabling users to manage their finances effectively. It incorporates various features like expense tracking, budgeting, and reminders.

AWARDS AND ACKNOWLEDGEMENTS

- Awarded Centennial College's "Excellence in Programming" scholarship in 2022
- Winner of local Hackathon for innovative mobile application idea in 2023
